YOUTUBE QA / SDET MASTER GUIDE

Tutorials • Interview Preparation • Career Guidance

100+ PAGE CONTENT & CHANNEL PLAYBOOK

TEACH → DEMONSTRATE → EXPLAIN → BUILD TRUST → BUILD COMMUNITY → CREATE CAREER OPPORTUNITIES

A practical YouTube content system for building authority around QA Automation, SDET skills, interview preparation and career guidance.

Abhishek Kamal
QA Automation | SDET Career Guidance
Learn. Build. Get Hired.
YouTube: Novice Makers

How to Use This YouTube Guide

The goal is not to upload random tutorials. Build repeatable content series that solve specific job-seeker problems and lead viewers from free learning to deeper career support.

Content funnel

SHORTS / SEARCH → LONG TUTORIAL → PLAYLIST → FREE SESSION → COMMUNITY → MENTORING / TRAINING

Three core pillars

Pillar	Content	Viewer outcome
Tutorials	QA, SQL, API, Python, Playwright, automation	Learn a skill
Interview Prep	Questions, coding, scenarios, mock interviews	Perform in interviews
Career Guidance	Roadmaps, projects, resume, job search	Get job-ready

01. QA Fundamentals — Content Series

Testing basics, SDLC/STLC, Agile, test cases, defects and exploratory testing.

Video ideas

• What is QA Fundamentals and why does it matter for QA/SDET?

• QA Fundamentals: beginner to job-ready roadmap

• Top interview questions on QA Fundamentals

• Build a practical QA Fundamentals example

• Common mistakes in QA Fundamentals

• Real-world debugging scenario using QA Fundamentals

• Project idea using QA Fundamentals

• How to explain QA Fundamentals in an interview

• 30-minute hands-on challenge: QA Fundamentals

• Advanced concepts recruiters expect in QA Fundamentals

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

01. QA Fundamentals — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

Field	Draft
Title	
Thumbnail promise	
Viewer problem	
Keywords	
Chapters	
CTA	
Next video	

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

02. SQL for QA — Content Series

Queries, joins, grouping, subqueries, CTEs, windows and interview problems.

Video ideas

• What is SQL for QA and why does it matter for QA/SDET?

• SQL for QA: beginner to job-ready roadmap

• Top interview questions on SQL for QA

• Build a practical SQL for QA example

• Common mistakes in SQL for QA

• Real-world debugging scenario using SQL for QA

• Project idea using SQL for QA

• How to explain SQL for QA in an interview

• 30-minute hands-on challenge: SQL for QA

• Advanced concepts recruiters expect in SQL for QA

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

02. SQL for QA — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

03. API Testing — Content Series

REST, HTTP, Postman, authentication, negative testing and API workflows.

Video ideas

• What is API Testing and why does it matter for QA/SDET?

• API Testing: beginner to job-ready roadmap

• Top interview questions on API Testing

• Build a practical API Testing example

• Common mistakes in API Testing

• Real-world debugging scenario using API Testing

• Project idea using API Testing

• How to explain API Testing in an interview

• 30-minute hands-on challenge: API Testing

• Advanced concepts recruiters expect in API Testing

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

03. API Testing — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

04. Python for QA — Content Series

Python foundations, collections, functions, OOP, exceptions and test utilities.

Video ideas

• What is Python for QA and why does it matter for QA/SDET?

• Python for QA: beginner to job-ready roadmap

• Top interview questions on Python for QA

• Build a practical Python for QA example

• Common mistakes in Python for QA

• Real-world debugging scenario using Python for QA

• Project idea using Python for QA

• How to explain Python for QA in an interview

• 30-minute hands-on challenge: Python for QA

• Advanced concepts recruiters expect in Python for QA

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

04. Python for QA — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

05. Python Coding for Interviews — Content Series

Practical coding problems with QA/SDET-oriented explanations.

Video ideas

• What is Python Coding for Interviews and why does it matter for QA/SDET?

• Python Coding for Interviews: beginner to job-ready roadmap

• Top interview questions on Python Coding for Interviews

• Build a practical Python Coding for Interviews example

• Common mistakes in Python Coding for Interviews

• Real-world debugging scenario using Python Coding for Interviews

• Project idea using Python Coding for Interviews

• How to explain Python Coding for Interviews in an interview

• 30-minute hands-on challenge: Python Coding for Interviews

• Advanced concepts recruiters expect in Python Coding for Interviews

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

05. Python Coding for Interviews — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

06. Playwright from Zero — Content Series

Installation, locators, auto-waiting, assertions, fixtures and first framework.

Video ideas

• What is Playwright from Zero and why does it matter for QA/SDET?

• Playwright from Zero: beginner to job-ready roadmap

• Top interview questions on Playwright from Zero

• Build a practical Playwright from Zero example

• Common mistakes in Playwright from Zero

• Real-world debugging scenario using Playwright from Zero

• Project idea using Playwright from Zero

• How to explain Playwright from Zero in an interview

• 30-minute hands-on challenge: Playwright from Zero

• Advanced concepts recruiters expect in Playwright from Zero

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

06. Playwright from Zero — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

07. Advanced Playwright — Content Series

Contexts, storage state, tracing, network mocking, API testing and parallelism.

Video ideas

• What is Advanced Playwright and why does it matter for QA/SDET?

• Advanced Playwright: beginner to job-ready roadmap

• Top interview questions on Advanced Playwright

• Build a practical Advanced Playwright example

• Common mistakes in Advanced Playwright

• Real-world debugging scenario using Advanced Playwright

• Project idea using Advanced Playwright

• How to explain Advanced Playwright in an interview

• 30-minute hands-on challenge: Advanced Playwright

• Advanced concepts recruiters expect in Advanced Playwright

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

07. Advanced Playwright — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

08. Selenium Masterclass — Content Series

WebDriver, locators, waits, POM, Grid and debugging.

Video ideas

• What is Selenium Masterclass and why does it matter for QA/SDET?

• Selenium Masterclass: beginner to job-ready roadmap

• Top interview questions on Selenium Masterclass

• Build a practical Selenium Masterclass example

• Common mistakes in Selenium Masterclass

• Real-world debugging scenario using Selenium Masterclass

• Project idea using Selenium Masterclass

• How to explain Selenium Masterclass in an interview

• 30-minute hands-on challenge: Selenium Masterclass

• Advanced concepts recruiters expect in Selenium Masterclass

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

08. Selenium Masterclass — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

09. PyTest Masterclass — Content Series

Fixtures, parametrization, markers, hooks, plugins and reporting.

Video ideas

• What is PyTest Masterclass and why does it matter for QA/SDET?

• PyTest Masterclass: beginner to job-ready roadmap

• Top interview questions on PyTest Masterclass

• Build a practical PyTest Masterclass example

• Common mistakes in PyTest Masterclass

• Real-world debugging scenario using PyTest Masterclass

• Project idea using PyTest Masterclass

• How to explain PyTest Masterclass in an interview

• 30-minute hands-on challenge: PyTest Masterclass

• Advanced concepts recruiters expect in PyTest Masterclass

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

09. PyTest Masterclass — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

10. Automation Frameworks — Content Series

Architecture, layers, POM, data, config, clients, utilities and reporting.

Video ideas

• What is Automation Frameworks and why does it matter for QA/SDET?

• Automation Frameworks: beginner to job-ready roadmap

• Top interview questions on Automation Frameworks

• Build a practical Automation Frameworks example

• Common mistakes in Automation Frameworks

• Real-world debugging scenario using Automation Frameworks

• Project idea using Automation Frameworks

• How to explain Automation Frameworks in an interview

• 30-minute hands-on challenge: Automation Frameworks

• Advanced concepts recruiters expect in Automation Frameworks

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

10. Automation Frameworks — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

11. Git & GitHub — Content Series

Branching, merge/rebase, pull requests, conflicts and automation repositories.

Video ideas

• What is Git & GitHub and why does it matter for QA/SDET?

• Git & GitHub: beginner to job-ready roadmap

• Top interview questions on Git & GitHub

• Build a practical Git & GitHub example

• Common mistakes in Git & GitHub

• Real-world debugging scenario using Git & GitHub

• Project idea using Git & GitHub

• How to explain Git & GitHub in an interview

• 30-minute hands-on challenge: Git & GitHub

• Advanced concepts recruiters expect in Git & GitHub

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

11. Git & GitHub — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Claims are accurate.

■ Viewer can reproduce the result.

12. CI/CD for QA — Content Series

Jenkins, GitHub Actions, pipelines, quality gates, artifacts and parallel execution.

Video ideas

• What is CI/CD for QA and why does it matter for QA/SDET?

• CI/CD for QA: beginner to job-ready roadmap

• Top interview questions on CI/CD for QA

• Build a practical CI/CD for QA example

• Common mistakes in CI/CD for QA

• Real-world debugging scenario using CI/CD for QA

• Project idea using CI/CD for QA

• How to explain CI/CD for QA in an interview

• 30-minute hands-on challenge: CI/CD for QA

• Advanced concepts recruiters expect in CI/CD for QA

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

12. CI/CD for QA — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

13. Docker for QA — Content Series

Images, containers, Compose, test environments and CI execution.

Video ideas

• What is Docker for QA and why does it matter for QA/SDET?

• Docker for QA: beginner to job-ready roadmap

• Top interview questions on Docker for QA

• Build a practical Docker for QA example

• Common mistakes in Docker for QA

• Real-world debugging scenario using Docker for QA

• Project idea using Docker for QA

• How to explain Docker for QA in an interview

• 30-minute hands-on challenge: Docker for QA

• Advanced concepts recruiters expect in Docker for QA

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

13. Docker for QA — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

15. Performance Testing — Content Series

JMeter, workload modelling, latency, throughput, p95/p99 and analysis.

Video ideas

• What is Performance Testing and why does it matter for QA/SDET?

• Performance Testing: beginner to job-ready roadmap

• Top interview questions on Performance Testing

• Build a practical Performance Testing example

• Common mistakes in Performance Testing

• Real-world debugging scenario using Performance Testing

• Project idea using Performance Testing

• How to explain Performance Testing in an interview

• 30-minute hands-on challenge: Performance Testing

• Advanced concepts recruiters expect in Performance Testing

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

15. Performance Testing — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

17. Mobile Testing — Content Series

Appium, device strategy, permissions, network conditions and mobile automation.

Video ideas

• What is Mobile Testing and why does it matter for QA/SDET?

• Mobile Testing: beginner to job-ready roadmap

• Top interview questions on Mobile Testing

• Build a practical Mobile Testing example

• Common mistakes in Mobile Testing

• Real-world debugging scenario using Mobile Testing

• Project idea using Mobile Testing

• How to explain Mobile Testing in an interview

• 30-minute hands-on challenge: Mobile Testing

• Advanced concepts recruiters expect in Mobile Testing

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

17. Mobile Testing — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

19. Observability for QA — Content Series

Logs, metrics, traces, correlation IDs, SLOs and production debugging.

Video ideas

• What is Observability for QA and why does it matter for QA/SDET?

• Observability for QA: beginner to job-ready roadmap

• Top interview questions on Observability for QA

• Build a practical Observability for QA example

• Common mistakes in Observability for QA

• Real-world debugging scenario using Observability for QA

• Project idea using Observability for QA

• How to explain Observability for QA in an interview

• 30-minute hands-on challenge: Observability for QA

• Advanced concepts recruiters expect in Observability for QA

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

19. Observability for QA — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

20. AI/LLM Testing — Content Series

Hallucination, RAG, groundedness, evaluation datasets, prompt regression and safety.

Video ideas

• What is AI/LLM Testing and why does it matter for QA/SDET?

• AI/LLM Testing: beginner to job-ready roadmap

• Top interview questions on AI/LLM Testing

• Build a practical AI/LLM Testing example

• Common mistakes in AI/LLM Testing

• Real-world debugging scenario using AI/LLM Testing

• Project idea using AI/LLM Testing

• How to explain AI/LLM Testing in an interview

• 30-minute hands-on challenge: AI/LLM Testing

• Advanced concepts recruiters expect in AI/LLM Testing

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

20. AI/LLM Testing — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

22. Interview Questions — Content Series

QA, SQL, API, Python, Playwright, automation and SDET scenario questions.

Video ideas

• What is Interview Questions and why does it matter for QA/SDET?

• Interview Questions: beginner to job-ready roadmap

• Top interview questions on Interview Questions

• Build a practical Interview Questions example

• Common mistakes in Interview Questions

• Real-world debugging scenario using Interview Questions

• Project idea using Interview Questions

• How to explain Interview Questions in an interview

• 30-minute hands-on challenge: Interview Questions

• Advanced concepts recruiters expect in Interview Questions

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

22. Interview Questions — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

23. Mock Interviews — Content Series

Fresher QA, Automation QA, SDET and Senior SDET mock interviews.

Video ideas

• What is Mock Interviews and why does it matter for QA/SDET?

• Mock Interviews: beginner to job-ready roadmap

• Top interview questions on Mock Interviews

• Build a practical Mock Interviews example

• Common mistakes in Mock Interviews

• Real-world debugging scenario using Mock Interviews

• Project idea using Mock Interviews

• How to explain Mock Interviews in an interview

• 30-minute hands-on challenge: Mock Interviews

• Advanced concepts recruiters expect in Mock Interviews

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

23. Mock Interviews — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

Field	Draft
Title	
Thumbnail promise	
Viewer problem	
Keywords	
Chapters	
CTA	
Next video	

Quality check

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

24. Career Roadmaps — Content Series

30/60/90-day plans, specialization choices, portfolio and job-search strategy.

Video ideas

• What is Career Roadmaps and why does it matter for QA/SDET?

• Career Roadmaps: beginner to job-ready roadmap

• Top interview questions on Career Roadmaps

• Build a practical Career Roadmaps example

• Common mistakes in Career Roadmaps

• Real-world debugging scenario using Career Roadmaps

• Project idea using Career Roadmaps

• How to explain Career Roadmaps in an interview

• 30-minute hands-on challenge: Career Roadmaps

• Advanced concepts recruiters expect in Career Roadmaps

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

24. Career Roadmaps — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

25. Resume & LinkedIn — Content Series

ATS-friendly resume thinking, project bullets, LinkedIn positioning and recruiter visibility.

Video ideas

• What is Resume & LinkedIn and why does it matter for QA/SDET?

• Resume & LinkedIn: beginner to job-ready roadmap

• Top interview questions on Resume & LinkedIn

• Build a practical Resume & LinkedIn example

• Common mistakes in Resume & LinkedIn

• Real-world debugging scenario using Resume & LinkedIn

• Project idea using Resume & LinkedIn

• How to explain Resume & LinkedIn in an interview

• 30-minute hands-on challenge: Resume & LinkedIn

• Advanced concepts recruiters expect in Resume & LinkedIn

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

25. Resume & LinkedIn — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

■ Audio is clear.

■ Screen text is readable.

■ Code is visible.

■ No unexplained steps.

■ Example actually runs.

■ Claims are accurate.

■ Viewer can reproduce the result.

26. QA Career Reality — Content Series

What companies actually test, common mistakes, skill priorities and career progression.

Video ideas

• What is QA Career Reality and why does it matter for QA/SDET?

• QA Career Reality: beginner to job-ready roadmap

• Top interview questions on QA Career Reality

• Build a practical QA Career Reality example

• Common mistakes in QA Career Reality

• Real-world debugging scenario using QA Career Reality

• Project idea using QA Career Reality

• How to explain QA Career Reality in an interview

• 30-minute hands-on challenge: QA Career Reality

• Advanced concepts recruiters expect in QA Career Reality

Episode structure

Hook → Problem → Concept → Live demonstration → Common mistake → Interview question → Exercise → Next video

26. QA Career Reality — Production Worksheet

Before recording

■ Define one viewer problem.

■ Write the outcome in one sentence.

■ Prepare a minimal working example.

■ List 3 common mistakes.

■ Prepare one interview question.

■ Prepare one exercise.

■ Prepare a clear next-video CTA.

Video metadata

Final YouTube Strategy

TEACH WHAT PEOPLE NEED → SHOW WHAT YOU BUILD → EXPLAIN HOW YOU THINK → HELP THEM GET HIRED

The strongest QA/SDET channel is not the one with the most uploads. It is the one viewers trust when they need to learn a skill, prepare for an interview or make a career decision.

LEARN → BUILD → RECORD → PUBLISH → ENGAGE → ANALYZE → IMPROVE → BUILD TRUST → BUILD COMMUNITY → GROW

YOUTUBE CREATOR ADDENDUM

Five final pages to make the channel practical, consistent and career-focused.

90-Day Publishing Scorecard

Period	Primary objective
Days 1–30	Establish QA fundamentals, SQL, API, Python and Playwright series
Days 31–60	Add projects, automation framework, CI/CD and interview content
Days 61–90	Add mocks, career guidance, live sessions and advanced SDET topics
Every week	Publish → answer comments → collect questions → improve next video

Weekly scorecard

- ■ Videos published
- ■ Shorts published
- ■ Viewer questions answered
- ■ GitHub/resource updates
- ■ Analytics reviewed
- ■ One experiment completed

YOUTUBE VIDEO SCRIPT WORKSHEET

A Repeatable Tutorial Script

HOOK → PROMISE → CONTEXT → TEACH → DEMO → COMMON MISTAKE → INTERVIEW QUESTION → EXERCISE → CTA

Section	Notes
Hook	What problem will be solved in the first 15 seconds?
Promise	What will the viewer be able to do by the end?
Concept	Minimum theory needed
Demo	Working example / screen recording
Mistake	One common beginner error
Interview	One question + strong reasoning
Exercise	What should the viewer build?
CTA	Next video / playlist / resource

Recording checklist

- ■ Close unnecessary applications.
- ■ Increase editor/browser readability.
- ■ Test the demo before recording.
- ■ Keep examples reproducible.
- ■ Remove long pauses and dead time.
- ■ Verify all technical claims.

YOUTUBE → PORTFOLIO FLYWHEEL

Turn Videos into Proof

VIDEO → GITHUB PROJECT → PDF CHECKLIST → FREE SESSION → COMMUNITY → NEXT PROJECT → NEXT VIDEO

Asset	Purpose
Tutorial	Teach the concept
GitHub repo	Prove implementation
Project guide	Give structured practice
Interview video	Connect skill to hiring
Live session	Create interaction
Community	Continue learning
Mentoring/training	Provide deeper support

Repurposing example

One Playwright framework tutorial can become a long video, three Shorts, a LinkedIn post, a GitHub exercise, an interview question video and a checklist.

CHANNEL QUALITY & TRUST

Trust Rules

- Never promise guaranteed jobs or salaries.
- Do not present copied projects as original work.
- Verify technical demonstrations before publishing.
- Disclose sponsorships or affiliate relationships.
- Use original explanations and demonstrations.
- Correct errors publicly when discovered.
- Separate personal experience from universal claims.
- Prefer evidence over hype.

Viewer trust test

Would a viewer be comfortable recommending this video to a colleague because it genuinely helped them?

FINAL CREATOR OPERATING SYSTEM

The Repeatable Loop

RESEARCH → PLAN → BUILD → RECORD → EDIT → PUBLISH → ENGAGE → ANALYZE → IMPROVE

Frequency	Action
Daily	Capture questions, ideas and technical problems
Weekly	Publish planned videos and review analytics
Monthly	Refresh playlists and identify content gaps
Quarterly	Review channel positioning, audience and strongest series

The channel's north star

HELP QA/SDET LEARNERS BECOME MORE CAPABLE, MORE CONFIDENT AND MORE JOB-READY.

Build authority by teaching useful skills, showing real engineering work and helping viewers take the next practical step.
